The USEPA and MDEQ are requesting a meeting with technical representatives of both BRG and Jacob Properties. This is to review technical issues only, specifically a site update including data review, progress update, and work plan update. We are also interested in the status of the expanded methane system and/ or pilot system, and schedule of any other future work, including the delineation work to identify the extent of the plume.

We would like to meet sometime on Thursday, Sept. 2, at the MDEQ office in Livonia. Please let us know of your technical representatives' availability.

Benjamin Mathews
Remediation and Redevelopment Division
